

KOPRI Fellowship Program 2022

Call for Applications

BACKGROUND

Korea Polar Research Institute (KOPRI) is a government-sponsored polar research institute of the Republic of Korea. While serving as the operator of national polar programs, KOPRI also advocates international cooperation in polar science and research.

KOPRI initiated the Fellowship Program in 2015 in an effort to promote research collaboration and provide future generation polar scientists with networking and research opportunities, by making use of its expanding infrastructure and capacity.

PROGRAM DETAILS

The KOPRI Fellowship Program 2022 consists of three categories: Asia, Arctic and Antarctic.

The program invites polar researchers to participate in its Institute Visiting Program that offers office space and/or laboratory access within the KOPRI facilities to awardees.

Once selected, the commencement dates and the details of the research activities are to be adjusted through consultation with the cooperating KOPRI scientists, and details should be forwarded to the Office of International Cooperation for travel and accommodation arrangements.

HOW TO APPLY

Each application for the KOPRI fellowship program must have the support of a KOPRI scientist. Therefore, those considering applying to the program are highly encouraged to contact KOPRI scientists and discuss their research proposal before they submit their application. In cases where it is difficult to identify a suitable cooperator, KOPRI's Office of International Cooperation will be able to provide assistance and additional information on KOPRI's research areas.

If you would like to apply for the 2022 KOPRI Fellowship Program, please submit your application to the following email address; fellowship@kopri.re.kr

In order for the application to be considered complete and valid, your application package must include an application form, research proposal, home institute agreement, and a letter of recommendation and should be submitted by May 13, 2022.

SUMMARY CHECKLIST FOR APPLICANTS

Category	Asia	Arctic	Antarctic
Program	- Institute Visiting Program		
Eligibility	- Early career scientists* from an Asian country	- Early career scientists from Arctic countries** - Researchers of Arctic Indigenous heritage*** in all career stages	- Early career scientists from Chile or New Zealand
Duration	- Up to 3 months at KOPRI		
Awards	- Travel (round-trip air fare) and living expenses - Accommodation within KOPRI facilities - Office and/or laboratory as arranged with the cooperating KOPRI scientist		
Application Documents	a. Application Form b. Research Proposal c. Home Institute Agreement d. Letter of Recommendation from an AFoPS Representative (or an equivalent entity)	a. Application Form b. Research Proposal c. Home Institute Agreement d. Letter of Recommendation	a. Application Form b. Research Proposal c. Home Institute Agreement d. Letter of Recommendation
Submission deadline	Application documents are to be submitted by May 13, 2022.		
- Prospective candidates are expected to be fully vaccinated against COVID-19 for their safety of travel. * COVID-19 quarantine expenses when entering Korea may be supported by KOPRI if needed. - Announcement for the fellowship awardees will be made in June 2022 by e-mail. - Awardees are required to submit a report upon completion of the program.			

* **Early career scientists:** Scientists and scholars who are currently enrolled in master or doctoral program, or within 5 years (2017-2021) of finishing their master or doctoral degree

** **Arctic Countries:** Canada, Denmark (including Greenland and the Faroe Islands), Finland, Iceland, Norway, Russia, Sweden and the United States

*** **Researchers of Arctic Indigenous heritage:** Scientists and scholars of Arctic Indigenous heritage who are currently enrolled in undergraduate or master or doctoral program, or have completed their undergraduate or master or doctoral degree

FURTHER INFORMATION

As the KOPRI Fellowship Program follows the Korean government's guidelines against COVID-19, operational details of the program are subject to change in accordance with updates to the guideline.
